TITLE: Optical disc substrate having superior heat resistance -
containing polyphenylene ether and optionally styrene
based resin.
DERWENT CLASS: A89 L03 T03 W04

AB JP 09237437 A UPAB: 19971119

An optical disc substrate contains a resin compsn. consisting of a polyphenylene ether-based resin, or a polyphenylene ether-based resin and a styrene-based resin.

USE - The optical disc substrate having superior heat resistance partic. finds its application in a digital video disc.

ADVANTAGE - The optical disc substrate has high heat resistance, low hygroscopicity, superior heat stability, and dimensional stability
